

BCS02: Summary of Student Progression

SMART only keeps limited information about student enrolments. To get detailed information about new enrolments, discontinuations, etc, requires looking at each student individually. The following tables represent that for students in the Bachelor of Computer Systems (Networking).

Commencements

Commencing students are those identified as being enrolled in one year, but not enrolled in the previous year. Diploma students are identified by having a BHI diploma/advanced diploma recored in SMART. It does not include diploma students from other TAFEs. VTAC students are identified by completing Year 12 the year before commencing the degree. International students are identified by ID. Direct entry are those not in other categories.
